■ Incluido en el equipo de serie.

## Fregar, aspirar y barrer en un solo proceso de trabajo

- Duplica la productividad del hombre y de la máquina.
- Reducción a la mitad de las horas trabajadas.
- No es necesario barrer previamente.

## Vaciado sencillo del contenedor alto de basura

- Cómodo para el operador.
- No hay contacto directo con la suciedad.
- El vaciado del contenedor de basura se realiza mientras el usuario está sentado.

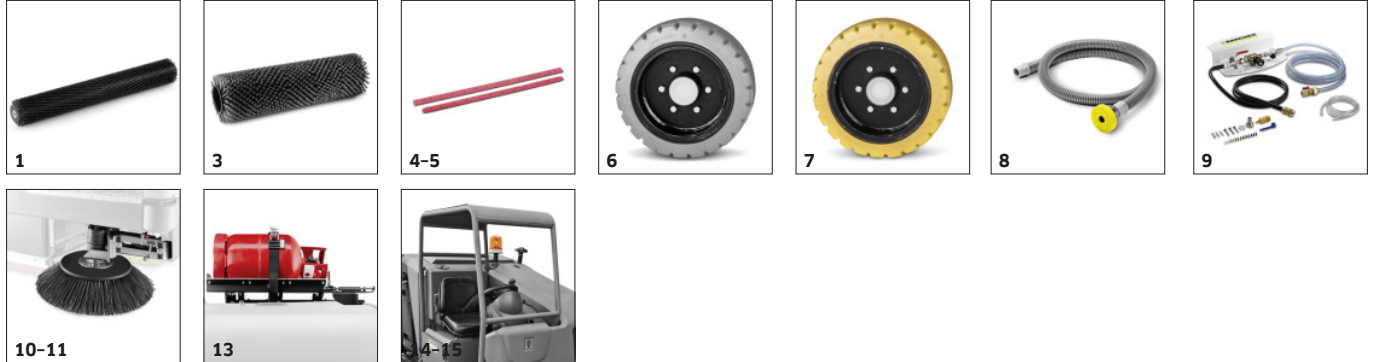

## Cepillo lateral giratorio/cepillos de plataforma de fregado lateral en ambos lados de la máquina

- Ampliación del ancho de trabajo hasta 1.755 mm.
- Permite un rendimiento de superficie de más de 16.000 m²/h.
- Protección de la máquina y de los objetos.

| Add-on kit ram protection suction bar B                     | 20 | 2.852-979.0 | Impact protection for our B 300 RI ride-on scrubber drier. Prevents damage to the squeegee when reversing and prevents collisions with obstacles above 5 cm in height, such as palletes.           | <input type="checkbox"/>            |
| Add-on kit back up camera B 300 RI                          | 21 | 2.852-980.0 | Reverse camera with 7" display for our B 300 RI ride-on scrubber drier. Improves visibility in reverse, helping prevent damage to the machine and its surroundings.                                | <input type="checkbox"/>            |
| Front and back Spotlight blue attachment kit for B 300 RI   | 22 | 2.852-981.0 | For the B 300 RI ride-on scrubber drier from Kärcher: Spotlight blue attachment kit. Projects a Spotlight blue a few metres ahead of the machine for enhanced safety, e.g. in high-bay warehouses. | <input type="checkbox"/>            |
| <b>SIDE BRUSHES</b>                                         |    |             |                                                                                                                                                                                                    |                                     |
| <b>Standard side brushes</b>                                |    |             |                                                                                                                                                                                                    |                                     |
| Side brush, standard                                        | 23 | 6.680-335.0 | With durable, water-resistant universal bristles. Suitable for all surfaces.                                                                                                                       | <input checked="" type="checkbox"/> |
| <b>Side brush, hard</b>                                     |    |             |                                                                                                                                                                                                    |                                     |
| Side brush, hard                                            | 24 | 6.680-336.0 | With mixed bristles made of PPL and steel for extreme soiling.                                                                                                                                     | <input type="checkbox"/>            |
| <b>SPRAY UNITS</b>                                          |    |             |                                                                                                                                                                                                    |                                     |
